

Our Grille Combination System consists of:

- Mist eliminator intake grille
- Custom duct and fan housing box
- Optional 1 or 2 x 9" Compact Fans (12 or 24 volt)
- Optional manual or auto fan speed controller

Fans can be added and set up as either supply or extraction air or a combination. With both fans on supply this combination grille system can service an engine room of 0-300 Horsepower. With 1 on supply and 1 on extraction these combination grilles can service an engine room of 0-150 Horsepower. We have white in stock however we can powder coat to your desired colour.
